

## Ingredients

**Phosphatidic acid:** a molecule specifically for the trichological treatment which stimulates the growth and proliferation of capillary bulb cells, prolonging the anagen phase and reducing the Catagen one.

**Riboflavin:** a group B vitamin particularly important in the metabolism of skin appendages. It plays a protective role in maintaining cell integrity and promoting a regular development.

**S.O.D.:** extracted from the seeds of melon, super oxide dismutase reduces the toxic effect of free radicals by neutralizing them. Its protective action ensures the proper development of the hair bulb and dermal epidermal cells

**Amino acids:** they're the biological basis for the construction of proteins. They ensure the proper development of the stem and the matrix of the hair.

## Indications

- Male and female pattern baldness
- Male frontal-parietal alopecia
- alopecia by UV
- alopecia by stress
- post-infectious alopecia
- alopecia from malnutrition
- alopecia areata
